OUR BUSINESS AFFILIATES

Digitally Legal is a Level 1 B-BBEE rated, black, female, youth owned and managed, data protection, cyber security, regulation and technology firm headquartered in Johannesburg, South Africa.

We are cyber lawyers with a creative edge and entrepreneurial flair. Our use of technology, regulatory guidelines and compliance paves the way to optimising your efficiency. We operate to increase revenue and harness a growth enabling environment. Our methods are approachable, clutter free and will future proof your people and organisation.

We recognise the undeniably rapid efficiency of technology and our job entails mitigating the associated risk, that is why we work with you to minimise opportunistic cyber attacks, regulatory noncompliance, reputational harm, civil and criminal liability. Some of our specialties are compliance and risk assessment, policy development and implementation, regulation and technology pairing, training and awareness.

Youth unemployment eradication and woman empowerment are at the epicentre of all our offerings. Transparency, Innovation, Progress and Sustainability ("TIPS") are principles woven into all our services.

Founding partner Zanyiwe Nthatisi-Asare is a University of the Witwatersrand LLB Law Graduate, admitted Advocate of the High Court of South Africa and multi industry entrepreneur. Her focus is on co-creating preventative strategy, implementing technology, all in the name of ensuring good governance, business excellence and sustainable success

DATA PROTECTION AND REGULATION (POPI)

Data protection applies beyond regulatory compliance. If not understood and approached adequately your company and top management can face hefty financial, civil and criminal liability. A data protection breach can leave your company exposed, susceptible to cyber hijacking leading to a loss of customer and consumer confidence.

Data Processing has domestic, regional and international implications as they are directly linked to privacy rights, legal stipulations and international political influence.

Let us help you maneuver collection, processing and dissemination of data, whether it's through technological or tradition means, in a manner that protects you, your clients and the future of your business.
